

Kai Cheng

Zhejiang University | Hangzhou, China
+86 159 9041 6075 | chengkai@zju.edu.cn | CyanHaze.github.io

RESEARCH INTERESTS

Representation Learning, World Models, 3D Vision, Embodied Perception

EDUCATION

Zhejiang University Sept 2024 – Present
Bachelor of Mechanical Engineering, School of Mechanical Engineering. GPA: 3.57 / 4.0 Hangzhou, China

RESEARCH EXPERIENCE

Undergraduate Research Assistant Mar 2026 – Present
State Key Laboratory of CAD&CG, Zhejiang University, Supervised by Prof. [Hao Chen](#) Hangzhou, China

- Developed an algorithm for 6D object pose estimation using binocular video sequences to handle complex Hand-Object Interactions (HOI).
- Leveraged spatial-temporal information from stereo cameras to improve the robustness of pose tracking under occlusions.

Undergraduate Research Assistant Sept 2025 – Feb 2026
State Key Laboratory of CAD&CG, Zhejiang University, Supervised by Prof. [Zhaopeng Cui](#) Hangzhou, China

- Worked on learning-based motion planning and safe local navigation for mobile robots in cluttered environments.
- Set up training/evaluation pipelines and visualized planned trajectories in simulated navigation scenarios.

AWARDS & TRAININGS

AI4Math Summer School: Lean4 and Mathematical Formalization July 2025
Shanghai Jiao Tong University (SJTU) Shanghai, China

- Awarded “Excellent Participant” for outstanding performance in coursework and assessment.
- Gained hands-on experience with mathematical formalization using the Lean 4 theorem prover.

TECHNICAL SKILLS

Programming	Python, C++, MATLAB, $\text{\LaTeX}$
Machine Learning / CV	PyTorch, OpenCV, NumPy, scikit-learn
Robotics / 3D Vision	ROS, stereo vision, camera calibration, motion planning
Tools	Git, Linux, Lean 4
