

Kai Cheng

Zhejiang University | Hangzhou, China
+86 159 9041 6075 | chengkai@zju.edu.cn | CyanHaze.github.io

RESEARCH INTERESTS

Representation Learning, World Models, 3D Vision, Robotcis, Dexterous Manipulation

EDUCATION

Zhejiang University

B.Eng. in Mechanical Engineering, School of Mechanical Engineering. GPA: 3.57 / 4.0
Relevant Coursework: Advanced Algebra, Probability and Statistics, Data Structures and Analysis, Machine Learning.

Aug. 2024 – Present

Hangzhou, China

RESEARCH EXPERIENCE

Research Intern

State Key Laboratory of CAD&CG, Zhejiang University, Supervised by Prof. [Hao Chen](#)

Mar. 2026 – Present

Hangzhou, China

- Developed an algorithm for 6D object pose estimation using binocular video sequences to handle complex Hand-Object Interactions (HOI).
- Leveraged spatiotemporal information from stereo cameras to improve the robustness of pose tracking under occlusions.

Research Intern

State Key Laboratory of CAD&CG, Zhejiang University, Supervised by Prof. [Zhaopeng Cui](#)

Sep. 2025 – Feb. 2026

Hangzhou, China

- Worked on learning-based motion planning and safe local navigation for mobile robots in cluttered environments.
- Set up training/evaluation pipelines and visualized planned trajectories in simulated navigation scenarios.

AWARDS & TRAINING

AI4Math Summer School: Lean4 and Mathematical Formalization

Shanghai Jiao Tong University (SJTU)

Jul. 2025

Shanghai, China

- Awarded “Excellent Participant” for outstanding performance in coursework and assessment.
- Gained hands-on experience with mathematical formalization using the Lean 4 theorem prover.

Mathematical Contest in Modeling (MCM/ICM) – Honorable Mention

COMAP

Jul. 2025

International

- Awarded Honorable Mention for team performance in mathematical modeling, data analysis, and technical writing.

TECHNICAL SKILLS

Programming

Python, C++, MATLAB, $\text{\LaTeX}$

Machine Learning / CV

PyTorch, OpenCV, NumPy, scikit-learn

Robotics / 3D Vision

ROS, stereo vision, camera calibration, motion planning

Tools

Git, Linux, Lean 4
